

Introduction to bmi Tipper Range

The **bmi group** are recognised as the UK's leading manufacturer for Walking Floor® and Ejector/Compactor trailers within the Waste & Recycling industry. 18 months ago we expanded our product range, and officially launched our **bmi Tippers**. Having soared in popularity since we began production – these vehicles exhibit the excellent manufacturing quality we are known for and are available in a choice of models and materials.

Hardbox Scrap Tipper

At **bmi** we build bespoke trailers with specifications that suit **your** needs. These HardBox Scrap Tippers are manufactured with the highest grade steel which provides high durability and maximum wear-resistance. Ideal for anyone in the scrap metal industry, these tippers have been built to demonstrate resilience and withstand the toughest working environments.

Half Pipe Alloy Tipper

Fitted with fully pressed 5083 grade Alloy tapered to improve centre of gravity, the **bmi** Half Pipe Alloy Tipper combines efficiency with stability. The design of the Half Pipe's body ensures an off-load performance which is fast and clean.

Half Pipe Hardox Tipper

Also available in steel, the **bmi** Half Pipe Hardox Tipper is suitable for moving all bulk materials. The Hardox 450 grade body has proven high-dent resistance when it comes to abrasive applications, making it the ideal trailer for carrying different types of construction materials.
